USER GUIDE

UG022 | WE ADS Library

Melon Huang

1. INTRODUCTION

ADS (Advanced Design System) is developed by PathWave Design of Keysight Technologies, which is an electronic design automation software system and provides an integrated design environment to designers of RF electronic products.

Würth Elektronik has a growing portfolio of models available for use in ADS. These models allow ADS users to accurately simulate, troubleshoot and solve RF issues before going to production.

For any new users of a tool, the basic functionalities must be learned before the tool can be put to use. For ADS, knowing how to correctly install and find the models is crucial. Our models can be installed via two ways: Wurth Electronics homepage, GitHub repository.

Note: The following instructions pertain to ADS versions 2012 or higher.

2. INSTALL FROM WEBSITE

Note: ADS models on homepage are always the latest.

2.1 Download from Würth homepage

Visit the WE product portfolio and navigate to the product you are interested in (Figure 1).

Figure 1: *Würth Elektronik Homepage*.

.

Alternatively, enter the part number or product series into the search bar located at the top of the page (Figure 2).

Figure 2: Search part number or series.

On each product series page, you will find the download column in the product list. Locate the ADS library in the dropdown list (Figure 3).

Figure 3: Download ADS libraries on Würth Elektronik Homepage.

2.2 Installing the model

Unzip the downloaded file to a folder of your choice (Figure 4).

Figure 4: Unzip library.

Open ADS and select "DesignKits" from the toolbar and click "Manage Libraries…" (Figure 5).
Figure 5: The location of the Manage Libraries.

Click the "Add Library Definition File…" button and browse to the unzipped folder. Select the "lib.defs" file and click "Open". The library import should now be complete and you can click the "Close" button (Figure 6 and Figure 7).

Figure 6: Adding the Library Definition File.

Figure 7: The new library's import in the "Manage Libraries" window.

Now you can use library in your schematic design or simulation (Figure 8).

Figure 8: Use for simulation.

3. INSTALL FROM GITHUB REPOSITORY

3.1 Install GitHub Desktop

GitHub Desktop is the most user-friendly tool for working with GitHub projects, and we recommend you use it for keeping your library files up to date.
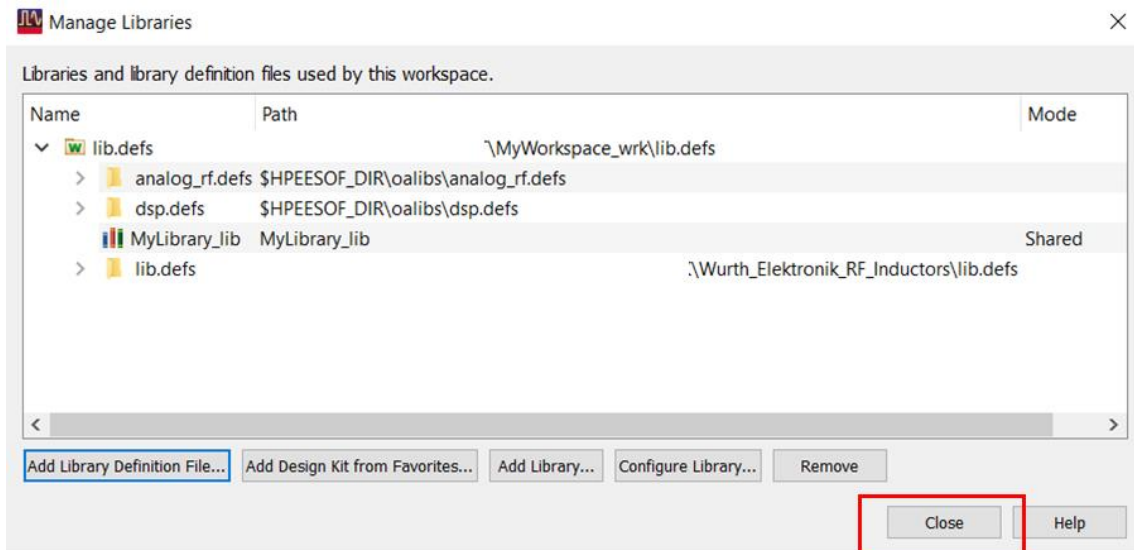

Go to https://desktop.github.com/ to download the appropriate package for your operating system and install it on your computer.

During the Desktop installation, register or sign in with your GitHub Account and click next. On opening the GitHub Browser webpage, authenticate yourself and give permission to the GitHub desktop application. The process will then return you to the desktop application.

3.2 Clone the Library

From GitHub Desktop, click the button "Clone a repository from the Internet…" (Figure 9).
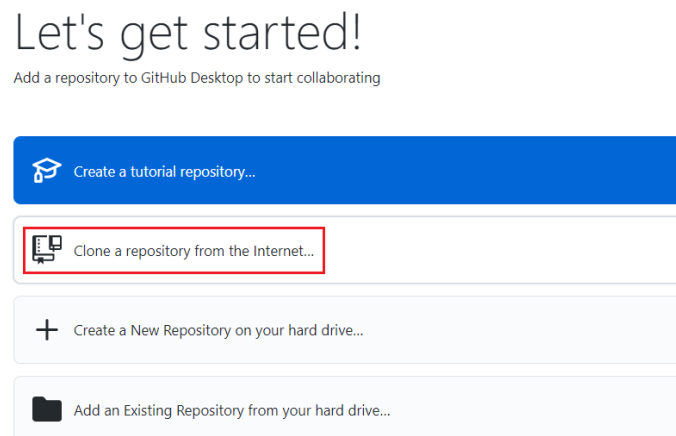

Figure 9: Clone a repository from the Internet.

Enter the URL of Würth Elektronik ADS Library repository https://github.com/WurthElektronik/ADS-Library.git and define a local directory to which to clone the repository.

Then click the "Clone" button. A window will then open, synchronizing the libraries into your local directory from the online repository. Cloning repository may take some time (Figure 10 and Figure 11).

Figure 10: Cloning the Würth Elektronik ADS Library repository to your local directory.

Figure 11: Cloning in progress.

3.3 Synchronize Local Library from GitHub

If there are updates in GitHub repository, GitHub Desktop will detect it. You can "Pull" the update to your local directory. If there are any new commits on the online master repository, from GitHub Desktop you'll receive the update information automatically.

Click "Pull origin" button to fetch the updates to your local directory immediately (Figure 12).

Figure 12: Pulling the repository to your local directory.

Click "View on GitHub" to explore more details of the latest updates (Figure 13).

Figure 13: View the updates on GitHub.

IMPORTANT NOTICE

The Application Note is based on our knowledge and experience of typical requirements concerning these areas. It serves as general guidance and should not be construed as a commitment for the suitability for customer applications by Würth Elektronik eiSos GmbH & Co. KG. The information in the Application Note is subject to change without notice. This document and parts thereof must not be reproduced or copied without written permission, and contents thereof must not be imparted to a third party nor be used for any unauthorized purpose.

Würth Elektronik eiSos GmbH & Co. KG and its subsidiaries and affiliates (WE) are not liable for application assistance of any kind. Customers may use WE's assistance and product recommendations for their applications and design. The responsibility for the applicability and use of WE Products in a particular customer design is always solely within the authority of the customer. Due to this fact it is up to the customer to evaluate and investigate, where appropriate, and decide whether the device with the specific product characteristics described in the product specification is valid and suitable for the respective customer application or not.

The technical specifications are stated in the current data sheet of the products. Therefore the customers shall use the data sheets and are cautioned to verify that data sheets are current. The current data sheets can be downloaded at www.we-online.com. Customers shall strictly observe any product-specific notes, cautions and warnings. WE reserves the right to make corrections, modifications, enhancements, improvements, and other changes to its products and services.

WE DOES NOT WARRANT OR REPRESENT THAT ANY LICENSE, EITHER EXPRESS OR IMPLIED, IS GRANTED UNDER ANY PATENT RIGHT, COPYRIGHT, MASK WORK RIGHT, OR OTHER INTELLECTUAL PROPERTY RIGHT RELATING TO ANY COMBINATION, MACHINE, OR PROCESS IN WHICH WE PRODUCTS OR SERVICES ARE USED. INFORMATION PUBLISHED BY WE REGARDING THIRD-PARTY PRODUCTS OR SERVICES DOES NOT CONSTITUTE A LICENSE FROM WE TO USE SUCH PRODUCTS OR SERVICES OR A WARRANTY OR ENDORSEMENT THEREOF.

WE products are not authorized for use in safety-critical applications, or where a failure of the product is reasonably expected to cause severe personal injury or death. Moreover, WE products are neither designed nor intended for use in areas such as military, aerospace, aviation, nuclear control, submarine, transportation (automotive control, train control, ship control), transportation signal, disaster prevention, medical, public information network etc. Customers shall inform WE about the intent of such usage before design-in stage. In certain customer applications requiring a very high level of safety and in which the malfunction or failure of an electronic component could endanger human life or health, customers must ensure that they have all necessary expertise in the safety and regulatory ramifications of their applications. Customers acknowledge and agree that they are solely responsible for all legal, regulatory and safety-related requirements concerning their products and any use of WE products in such safety-critical applications, notwithstanding any applications-related information or support that may be provided by WE.

CUSTOMERS SHALL INDEMNIFY WE AGAINST ANY DAMAGES ARISING OUT OF THE USE OF WE PRODUCTS IN SUCH SAFETY-CRITICAL APPLICATION.
